

MASTER OF SCIENCE STRATEGIC INFORMATION AND CYBERSPACE STUDIES

The Master of Science in Strategic Information and Cyberspace Studies Degree Program is a selective program that addresses the educational needs of defense and government leaders who seek to lead complex and diverse 21st Century organizations. Participants from across defense and other federal, state, and local government organizations create a learning community hallmarked by partnerships, information sharing, and network synergies.

The Master of Science in Strategic Information and Cyberspace Studies focuses on the information instrument of power and cyberspace. It provides graduate-level education to senior military and civilian leaders with an emphasis on the military, government, and private sector dimensions of information and cyberspace as a critical component of national security strategy.

Successful graduates of the Master of Science in Strategic Information and Cyberspace Studies will be able to:

- Evaluate the national security environment with a focus on the impact of the information instrument of power and cyberspace.
- Create information strategic and policy options that support joint warfighting and achieve national security objectives.
- Create cyber strategic and policy options that support joint warfighting and achieve national security objectives.
- Evaluate principles of the profession of arms, civil-military relations, and ethics to support strategic-level decision-making.
- Demonstrate strategic leadership to include effective communication and creative and critical thinking in a joint, interagency, and multinational environment.
